Re: Passive Sampler and Transplant Mussel Deployment: Week of August 31, 2009	08/28/2009 01:06 PM

Item Body

Hi Sharon,

I am in Atlanta at the moment, however. I will be back at the terminal on Monday. Please talk with Bill Buffalow to see if we have a ship on "B" berth on Monday. His no. Is 510-307-4034.
Jim

Subject: Passive Sampler and Transplant Mussel Deployment: Week of August 31, 2009

Dear Jim:

I'm requesting authorization for the following EPA personnel and contractors to access the Levin-Richmond Terminal immediately adjacent to the Lauritzen Channel on **Monday August 31st**. EPA will be deploying passive samplers and transplanted mussel samples in the Lauritzen Channel, Parr Canal and Santa Fe Channel on **Tuesday September 1st and Wednesday September 2nd, 2009**.

Julie Spahn, EPA's contractor, discussed the upcoming field work with Manson Construction Representative Steve Gregory on August 27th, 2009. We understand that Manson is currently storing and staging barges and equipment in the Lauritzen Channel in anticipation of a large scale deployment in September 2009. Ms. Spahn and Mr. Gregory agreed that the field team will review the locations of barges in the Channel on Monday August 31st and discuss by phone needed coordination to facilitate access to sampling points within the channel, as feasible.

We anticipate the following field staff request access to the LRTC site on Monday:

Sharon Lin - EPA
John McFarland- MIT
Phil Gschwend - MIT
Tamara Davis - CH2MHILL
Julia Spahn- CH2MHILL
Laurie Sullivan - NOAA

Thanks in advance for your assistance. If you have any questions, please give me a call. My cell phone number is (415) 902-6532.
